# Bear Cubs

Washington University Nursery School

## Dinosaurs!

Bear Cubs love playing with dinosaurs! We learned some big words like: extinct, carnivores (meat eaters), herbivores (plant eaters), and omnivores (meat & plant eaters). We made dinosaur footprints in play dough. We also sorted and organized the many different dinosaurs.

## Save the Date!

### Conferences 4/20-21

-No School for students. We look forward to seeing you to discuss your amazing children!

### Day for Moms 5/5

Calling all moms, grandmothers, and special friends! Please join us for a special day!

### School Picnic 5/9

Please join us at Shaw Park with your family!

Incredible Structures

## Spring!

On Monday WUNS had a very “egg-citing” delivery from the farm! 26 Chick eggs were put in an incubator in the Big Bear room that will keep the eggs warm for 21 days. The Bear Cubs will be checking in on the eggs until they hatch. This is a special WUNS tradition that children will

remember for years to come. Next week a WUNS alum will talk to us about her hen and how she was inspired by her experience with the chicks.

This week we made nests, eggs, flowers and talked about the Spring changes all around us! Enjoy this beautiful weekend!

## FOOD CHAINS:

Miss Liz came to talk to us about food chains. She showed us an actual chain that is connected with each link. The Bear Cubs each received different links of a food chain and we put them in order. One such chain consisted of: the sun, grass, an insect, and finally a bird. Miss Liz explained that if a link of the chain is broken, it affects the entire chain. We look forward to “Nature on the Move” with Miss Liz each month!
